## **OC VETTES PRESIDENT'S MESSAGE**

Hi Everyone!

I know most of you know I'm going through some health issues but, so far, I'm still able to perform my Club duties. I really appreciate and thank you all for your support and prayers.

March is finally showing the start of Spring! It feels great to be outdoors in the sun and we are beginning to get out and about! Tony Siragusa has set up the Warner Bros. Studio Tour for Saturday, April 20th. The cost is \$58 per person. Tony needs to get the money to Warner Bros two weeks prior to our visit so let him know you want to go and pay your money.

RTE 66 Fun Run trip is only a month away!!! Ron and Michael Molendyk will have the itinerary out at our next General Meeting. We will be leaving from the Denny's Restaurant in Fullerton, off the 57 freeway on May 1st. Before any trips, make sure that all maintenance items have been taken care of on your Corvettes.

We still need people to sign up to host our Monthly Socials starting with April. How about introducing us to one of your favorite restaurants and sign up. If you need help with the "how to" just ask a Board member.

Let's Drive!

Leo Mann  
President, OCVettes

# FEBRUARY SOCIAL at NEWPORT RIB COMPANY

Our February Social at Newport Rib Company in Costa Mesa was great! Thirty-two members braved a rainy evening to enjoy delicious bar-b-que ribs, tri-tip, etc. We had the back room to ourselves and the servers were kept busy. Serving sizes were generous and we saw several happy people walking out with “doggy bags”. Thanks to all who attended.

# **CORVETTE TECH TIPS**

## **Submitted by Richard Sheff**

Greetings, OC Vettes!

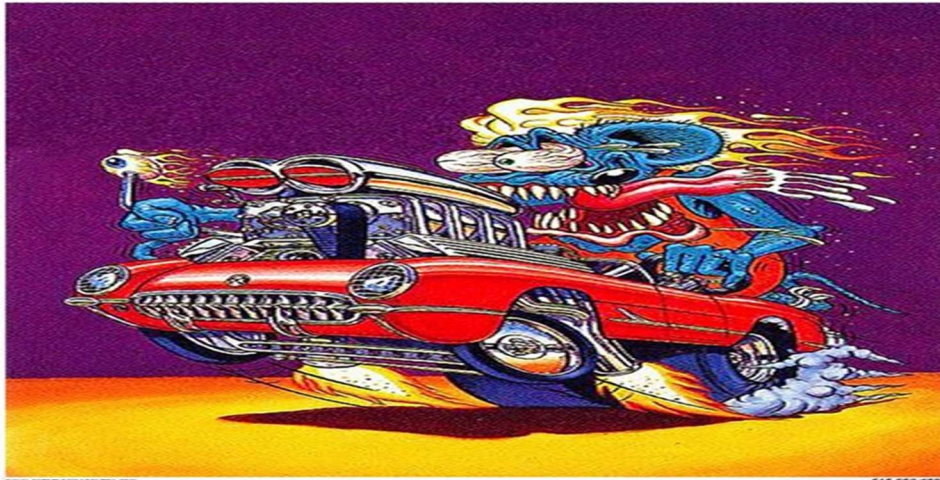

Buckle up. It's time for another tip to make your C 8 great again. What follows is an excellent design mod I love and you will too.

This month's feature is a much needed appearance enhancement for the stern of your mid-engine marvel (Stingray or Z06) — arguably, the area most in need of an aesthetic upgrade. This mod's so good, I think even Kirk Bennion, Corvette's exterior design chief, would approve.

Personal disclosure. As a self-confessed "Vettehead" and C 8 owner, I am an addict. I am compelled to find ways to wake-up my Gen 8's formidable OEM performance and improve upon its already stunning, good looks. Most admirers, those who are not enthusiasts, are confused by my obsession. They consider the latest version of "America's Sports Car" to be a performance beast and automotive design perfection. My reality. There's no such thing as perfection. And that's the reality shared by many other lucky Gen 8 Corvette owners, as well.

Controlling this powerful urge can be tricky. If you want to avoid "pimping your ride" or turning your C 8 into an expensive, "Big Daddy Roth" cartoon, I'm here to help. As a reminder: I use every product featured. I have no

financial interest in any of the companies recommended, and I dig mods that are effective, subtle, inexpensive and chrome.

When I first saw it; I had to have it. It's that good.

The C 8's rear license plate cover was designed to fit multiple domestic and foreign plate sizes. The story behind its odd, 6 sided shape though, remains a mystery. Problem is, this area is much too large for American license plates. For me, that makes the empty space that surrounds the license plate look unfinished. That bothered me. It bothered me a lot. Thankfully, I found the perfect fix for GM's design blunder. It's beautifully executed, inexpensive and simple to install.

My solution: The Etesan license plate holder, available on Amazon for \$159. Their unit is a: 2 layer, 3 dimensional rear bezel that beautifully fills that empty space your rear license plate now calls home. The bezel fits the entire plate area perfectly, matches the the OEM bumper grills flanking it, is all aluminum, comes painted black and includes a carbon fiber back plate. It's also ridiculously easy to install and the back plate gives you 2 "mout" (sic) or appearance options. Etesan's package is extraordinarily complete. All the necessary hardware and tools are included to make installation quick, secure and easy.

## TWO MOUT OPTIONS

////////////////// STYLE 1 Carbon fiber + Aluminum //////////////////

////////////////// STYLE 2 All-Aluminum line //////////////////

Congratulations on your newly enhanced C 8. It's beautiful and it's fast. Time to give all your mid-engine mods a road test. Take these 5 critical steps — in the order in which they appear — to give your freshly modded mid-engine monster a proper road test. Start the process by initiating the "hood's" version of an "Italian tune-up" and "drive it like you stole it." Return your ride to your garage. Let it cool down. Give it a final,

admiring look; then go have a beer. Not a Bud Lite. A real beer. After all, isn't that what being part of the Corvette community's all about? That, my Corvette colleagues, is how we roll.

One final thought before I go. Who among you has actually installed any of the mods I've suggested? If you have not, and you think I'm an idiot for wasting space in the club's newsletter every month, let me know. I won't hit you. I'd just like a little feedback; that's all.

Look for more tips in the next issue of the *Orange Pits*.

Until next month, safe travels, everyone.
